K. Nomura
A refinement of the split decomposition of a tridiagonal pair 1
T. Furuta
Reverse inequalities involving two relative operator entropies and two relative entropies 24
R. Felipe, N. López-Reyes, F. Ongay and R. Velásquez
Yang-Baxter equations on matrix dialgebras with a bar unit 31
S.M. El-Sayed and M.G. Petkov
Iterative methods for nonlinear matrix equations $X + A^{\star}X^{-\alpha}A = I$. 45
W.F. Trench
Multilevel matrices with involutory symmetries and skew symmetries 53
K.S. Berenhaut and D. Bandyopadhyay
Monotone convex sequences and Cholesky decomposition of symmetric Toeplitz matrices 75
E. Ed-dari
On the numerical index of Banach spaces 86
O. Rojo and R. Soto
The spectra of the adjacency matrix and Laplacian matrix for some balanced trees 97
K. Nomura
Tridiagonal pairs of height one 118
X. Li and E. Arroyo
A condition for the superiority of the (2,2)-step methods over the related Chebyshev method 143
K.C. Smith and L. van Wyk
A concrete matrix field description of some Galois fields 159
D. Chillag, R. Holzman and I. Yona
Primitive normal matrices and covering numbers of finite groups . . . 165
D. Kobal
Belitskiĭ's canonical form for 5×5 upper triangular matrices under upper triangular similarity 178
C. Kravvaritis, M. Mitrouli and J. Seberry
On the growth problem for skew and symmetric conference matrices 183
G. Dahl
A method for approximating symmetrically reciprocal matrices by transitive matrices 207

Table of Contents continues

Table of Contents continued

A. Böttcher and D. Wenzel
How big can the commutator of two matrices be and how big is it typically? 216
C. Meng, X. Hu, L. Zhang and F. Uhlig
Completion of an orthogonal projector and a related inverse mapping problem 229
A. Fošner
Order preserving maps on the poset of upper triangular idempotent matrices 248
H. Myšková
Interval systems of max-separable linear equations 263
B. Zheng and Y. Sheng
On transformation partly preserving a nonsingular bilinear function 273
A. Cossidente and A. Siciliano
On some maximal subgroups in Aschbacher's class $\mathscr{C}_5$ 285
A. Klein, G. Mélard and P. Spreij
On the resultant property of the Fisher information matrix of a vector ARMA process 291
G.-S. Cheon and I.M. Wanless
An update on Minc's survey of open problems involving permanents 314
F.D. Martínez Pería, P.G. Massey and L.E. Silvestre
Weak matrix majorization 343
S. Matsumoto
α-Pfaffian, pfaffian point process and shifted Schur measure 369
P. Ji and L. Wang
Lie triple derivations of TUHF algebras 399
M. Fiedler
Geometry of the Laplacian 409
J. Benítez and N. Thome
Idempotency of linear combinations of an idempotent matrix and a t-potent matrix that commute 414

Author index to volume 403 419
